

# Join the Seal & Save Revolution.

## Maximize Efficiency & Comfort!

Make-Up Air Systems use extensive vertical ductwork to circulate fresh air.

Leaks hinder performance, waste energy, increase carbon emissions, and affect tenant comfort. Seal those leaks and boost efficiency now!

Make-Up Units are quickly becoming a financial and carbon liability. **Eliminate the needless waste, today!**

Increase airflow  
by **20-35%**

Annual energy  
savings of up to **40%**

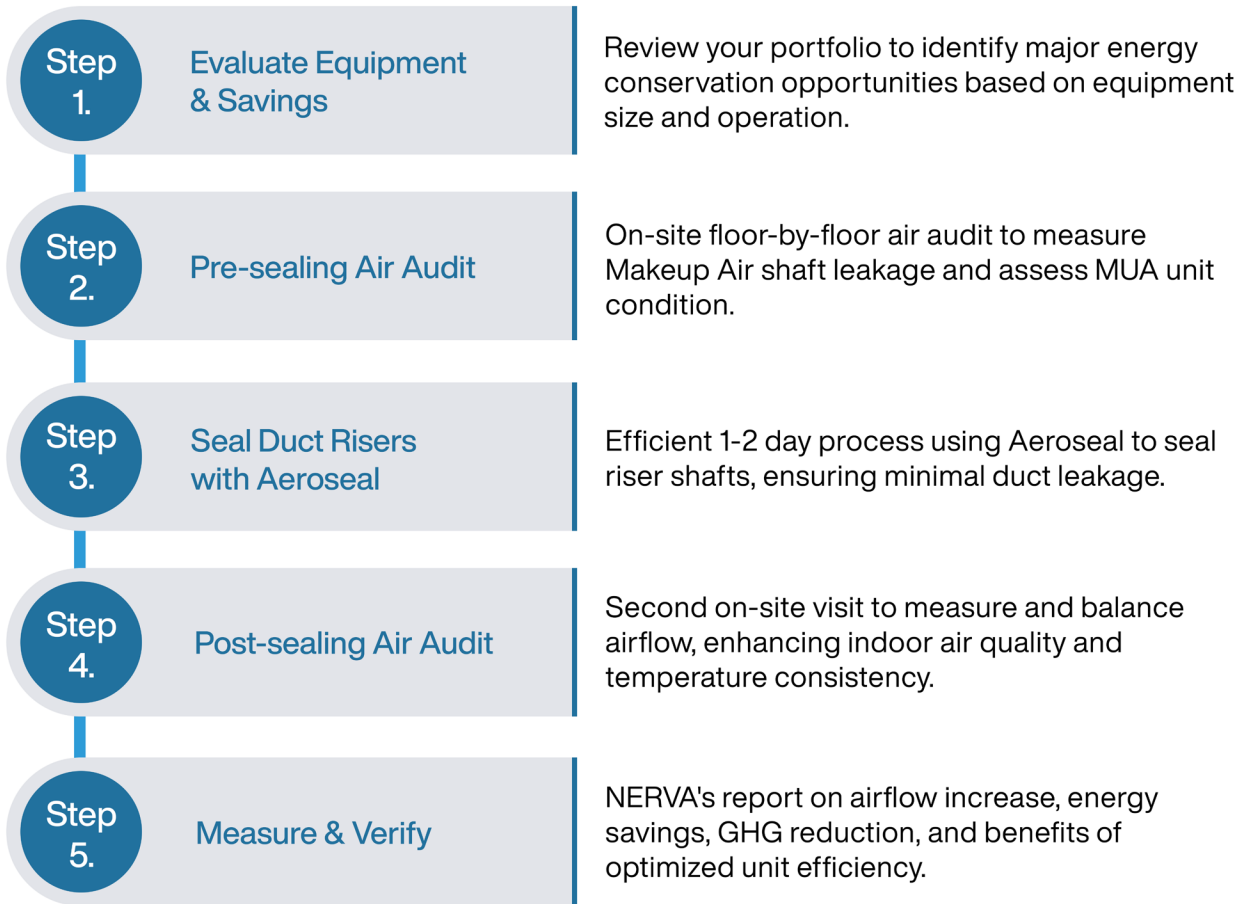

Up to **25%**  
GHG reduction

**Reduce** maintenance  
and failures

## How it Works

## Featured Case Studies

433 King St, London

- ✓ **22%** Airflow Increase
- ✓ **\$9,567** Annual Energy Savings
- ✓ **60%** Simple ROI (10 yr avg)
- ✓ **2.4 Yrs.** Payback Period
- ✓ **38%** GHG Reduction

25 Capreol Ct, Toronto

- ✓ **31%** Airflow Increase
- ✓ **\$89,309** Annual Energy Savings
- ✓ **73%** Simple ROI (10 yr avg)
- ✓ **2 Yrs.** Payback Period
- ✓ **32%** GHG Reduction

555 Sherbourne St, North York

- ✓ **33%** Airflow Increase
- ✓ **\$32,842** Annual Energy Savings
- ✓ **56%** Simple ROI (10 yr avg)
- ✓ **2.4 Yrs.** Payback Period
- ✓ **33%** GHG Reduction
